Subject: CLP Samples

Dear Ms. Von Hofen:

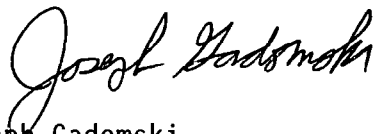

Seven organic samples shipped to Western Research Institute on May 18, 1993, for Case 20024 were incorrectly listed for the alpha part of the sample Contract Laboratory Program (CLP) organic number. The samples were identified on the organic traffic report as "ESC" instead of "ESE." The sample bottles did have the correct organic label. After receiving your fax transmittal on May 20, 1993, at 12:23 p.m., I called you with the action to be taken at 1:48 p.m. of the same day. I informed you that "ESC" was incorrect and that the laboratory should use "ESE" as the alpha part for the organic number.

In addition, changes were made to the traffic reports so that the Sample Management Office "SMO" would be able to input the correct organic numbers into the sample database. The corresponding organic number on the inorganic traffic reports was also corrected for the same reason.

Please notify me if any additional information or assistance is required. Thank you for your cooperation.

Sincerely,

B&V WASTE SCIENCE AND TECHNOLOGY CORP.

Joseph Gadomski
